Call for Papers: The Taiwan Summer Workshop on Information Management 2026
Theme: Innovating with Care: Building Effective and Responsible Human-AI Service Systems

Important Dates	Details + templates + submission portal:
Submissions Open: February 15, 2026 Submission Deadline: April 15, 2026 Decision Notification: May 31, 2026	https://tswim2026.ctm.nthu.edu.tw/

The Taiwan Summer Workshop on Information Management (TSWIM 2026) invites submissions to a developmental research workshop. TSWIM brings together Editors-in-Chief and Senior/Associate Editors from leading IS journals to provide constructive, developmental mentorship through active dialogue and extended feedback.

1. Submission Categories
Accepted submissions will be assigned to either a Presentation Session or a Research Incubator Session.
- Full Paper (up to 15 pages): Completed studies with data analysis and discussion. Intended for the Presentation Session.
- Short Paper (up to 8 pages): Work-in-progress with preliminary data or results. Assigned to Presentation or Incubator depending on maturity.
- Extended Abstract (up to 2 pages, plus up to 1 page references): High-potential ideas, novel research designs, or high-risk proposals in the pre-data collection stage. Intended for the Research Incubator Session.

2. Session Formats
- **Presentation Session**: For polished manuscripts targeting leading journals in IS or related fields. Feedback focuses on theoretical contribution, framing choices, and anticipated reviewer reactions.
- **Research Incubator Session**: Small-group, highly developmental forum for early-stage projects facing bottlenecks in theory building, framing, or study design. Senior scholars (local and international) serve as strategic advisors to help clarify next steps.

Why Submit?
- This is a non-archival workshop. Papers are NOT published in proceedings, ensuring you retain full copyright to submit to journals later.
- Participants engage directly with Editors who act as mentors, not just evaluators.
- TSWIM offers a low-pressure, high-trust environment focused on research development. Scholars gain constructive guidance, fresh perspectives, and opportunities for collaboration without reputational risk.

If you have any questions about TSWIM 2026, please email tswim2026@iss.nthu.edu.tw

Best regards,
